Questions 13-18
Label the map below
Write NO MORE THAN TWO WORDS for each answer.

Now, if we turn and walk east, you'll see a lake on your right and the petting farm on your left. As you know, they like colder temperatures and the waters of the Blue Lake are best suited for them. Next, they can get to the lake by going under this bridge we're standing on. If we go straight on, we'll come to another lake, but that is for the reptiles and amphibians to lounge around in.

reptiles 爬蟲類
amphibians 兩栖類

HR2-- 聽力 Basic Monologue

錄音原文：

Thank you for volunteering to help out at the athletics festival. For ease of identification and to divide up the duties, I have assigned each of you to a colour-coded squad or team. You will be given a coloured cap to wear. **Green** caps are in charge of communications, so they will answer any enquiries from the public over the phone or in person. They will also be the team on the gate **taking entrance tickets** and handing out programmes. Those of you who will be stationed outside the **stadium** at the booths selling tickets will wear blue caps. The blue team is also responsible for directing traffic in the car park.

WRITER'S BLOCK

The effects of a caffeine nap are much more powerful if the coffee is good. A semi-automatic pump espresso machine makes an excellent brew and it is easy to operate. The machine is turned on at the on/off switch at the bottom and, with the portafilter securely in place, allowed to heat for at least 20 minutes. The temperature light on the control panel at the top will indicate when the machine is ready. Then, pre-ground beans are measured into the portafilter, levelled off, and pressure is applied with a tamper to create an even seal. The pump is started by pressing the square button in the middle of the control panel and the water flows through the coffee into the cup. When there is enough espresso in the cup, the pump is shut off by pressing the button again. The portafilter is then removed and the used grinds are banged out. It should be rinsed well and dried before being placed back under the grouphead ready for the next shot.

Chart 1

The graph shows the usage of four different types of transport in Metropolis from 1895 to 2010.

Write a report on this chart, describing its main features and comparing and contrasting where appropriate.

大眾運輸工具

私人運輸工具

第二段：甲方細節描寫

S1: Light rail and bus usage was approximately the same in 1895, at around 5 million trips, but in 1990 light rail saw a dramatic increase to reach approximately 7.8 million trips by 2010.

S2: By 2010, this was the most popular form of transport at just over 8 million trips.

Chart 1

The graph shows the usage of four different types of transport in Metropolis from 1895 to 2010.

Write a report on this chart, describing its main features and comparing and contrasting where appropriate.

Sample Answer for Chart 1

The line chart illustrates changes in four methods of travel in Metropolis from 1895 to 2010, measured in five-year intervals. In general, there was an increase in travel over the period. The use of public transport markedly increased, while private car usage declined slightly.

Light rail and bus usage was approximately the same in 1895, at around 5 million trips, but in 1990 light rail saw a dramatic increase to reach approximately 7.8 million trips by 2010. By 2010, this was the most popular form of transport at just over 8 million trips. Usage of buses remained steady as trains grew in popularity, but in 2000, this also started to grow to a high of just over 7 million trips in 2010.

In 1895, private cars were the most popular form of transport in Metropolis, at just over 6 million trips. However, there was a small but steady decline in car usage to just under 6 million in 2010. Motorbike usage fluctuated, but overall, there was a small increase from about 3.5 million trips in 1895 to just under 4 million in 2010.

Charts 2 and 3

The pie chart below shows where energy is used in a typical Australian household, and the table shows the amount of electricity used according to the number of occupants.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

第三段：表格

S2: A three-person Australian household typically uses about the same as two people (6,000-8,000) or perhaps up to 10,000 kWh.

S3: Six people or more living in the same house have only double the consumption of a two-person household.

解析：依次向下報告，並比較不同欄位之間的異同。
